

# LEA

## LAB OF EXPERIMENTAL ART

LEA is a 200sqm space dedicated to experimentation in visual creation but also to innovation in the management of art and culture. The space is divided into two main areas: the laboratories, with specialized facilities to host all kinds of artistic processes, and the public area, an open space prepared for activities with curators, gallery owners, associations or managers in specific events. The space thus becomes a meeting place for a community rich in languages, discourses and ideas related to art and experimentation.

Artists access LEA through a selection process for artist residencies, with a minimum duration of six months and a maximum of one year. FULL TIME residencies and VIRTUAL residencies are available for international artists who request them.

Our programs of sponsorship, curatorial, workshops, classes and conferences conform a cultural machinery of great efficiency and sustainability.

LEA is located at Calle Lucano 67, Madrid, next to the Wanda Metropolitano stadium and Madrid's green ring. The nearest metro stop is Las Musas. Our opening hours are from 9:00 to 21:00, if you want to visit us write us to make an appointment.: [labofexperimentalart@gmail.com](mailto:labofexperimentalart@gmail.com)
